This catalog supports AFPD 21-2, *Nonnuclear and Nuclear Munitions*. It contains operational and training munitions authorizations and explains how these authorizations are established, reviewed, and changed. This publication is the primary munitions authorization source unit and command functional areas use to forecast ground munitions needs. Justification referenced in other Air Force/MAJCOM directives listing munition requirements will be provided to the appropriate authority, if applicable. Send comments for and suggested improvements on AF Form 847, Recommendation of Publication, through command channels to HQ AFSFC/SFOR, 1631 Stewart St., Suite 101, Lackland AFB TX 78236-5000.

Provides general information on establishing, changing, and estimating operational and training munitions authorizations. It also explains how to maintain expenditure data and provides special instructions for munitions authorizations.

Provides munitions authorizations for training, exercises, evaluations, and competitions.

Provides munitions authorizations for peacetime security, war and contingency operations, and mobility.

SUMMARY OF REVISIONS

This revision updates guidance for operational and training munitions authorizations; and updates operational and training authorizations for several functional areas. A | indicates revised material since last edition.

Chapter 3—	OPERATIONAL MUNITIONS AUTHORIZATIONS	103
Section 3A	Security Forces and USAF Special Investigations Academy (USAFSIA) Munitions Authorizations	103
3.1.	General Information.	103
3.2.	Definitions:	103
3.3.	Security Forces and USAF Special Investigations Academy (USAFSIA)	103
Section 3B	Civil Engineer Munitions Authorizations (HQ AFCESA/CEX)	111
3.4.	For Prime Base Engineer Emergency Forces (BEEF).	111
Section 3C	Pararescue Munitions Authorizations (HQ ACC/DOTO)	114
3.5.	For Pararescue Mission Defense.	114
Section 3D	Ground Theater Air Control System (GTACS) Air Control Squadrons (ACS) (OPR: HQ ACC/DOYG)	116
3.6.	For Mission Defense.	116
Section 3E	Services Munitions Authorizations (OPR: HQ USAF/ILVX)	116
3.7.	For Prime RIBS.	117
Section 3F	Air Mobility Command Munitions Authorizations	117
3.8.	For 615th and 621st AMOG's Equipment (Weapons) During Exercises and Contingencies (OPR: HQ AMC/DOOM). These munitions are separate and additional to mobility authorizations. They are to establish operating levels (Category C).	117
Section 3G	Air Force Special Operations Command Munitions Authorizations	117
3.9.	For protection of Air Force resources and personnel (OPR: HQ AFSOC/DO). See notes for unit applicability.	118
Section 3H	Combat Communications Units Munitions Authorizations (OPR: HQ ACC/SCSS)	124
3.10.	Combat Combinations Units. For mission defense. All deployable combat communications mobility personnel are authorized munitions listed below.	124
Section 3I	Air Force Space Command Munitions Authorizations (OPR: HQ AFSPC/SC)	124
3.11.	The Following Authorizations are for the 721st Mobile Command and Control Squadron for Protection of Air Force Resources and Personnel. (OPR: 721st Mobile Command and Control Squadron)	124
Section 3J	Air Force Safety Center (OPR: HQ AFSC/SEFW)	125
3.12.	Bird/Wildlife Strike Hazard (BASH) Authorization.	125
Section 3K	Miscellaneous Munition Authorizations (OPR: HQ AFSFC/SFO)	125

- 3.13. These authorizations provide munitions for peacetime arming needs and mobility unit type codes (UTC) not covered in previous authorization tables. USAF medical, comptroller, personnel, office of special investigations, and aviation support are examples of UTCs covered in this table. Mobility forces should take the authorized quantity for each firearm when deploying. Any required sustaining quantity will be provided from previously positioned stocks or subsequent resupply. 125

Chapter 1

GENERAL INFORMATION

1.1. Establishing Munitions Authorizations. Units or functions responsible for an operational mission or training program send a request to create a munitions authorization to the parent major command (MAJCOM) functional manager. Each request:

1.1.1. Contains complete explanation of the need for the specific munitions. Include computational methodology as to how the requirement was determined; i.e., operational mission (air base defense basic quantity) or training (number of students or classes) x (amount of munitions) x (number of classes/sessions per year), etc.

1.1.2. Includes annual requirement for each munitions type.

1.1.3. States if requirement is an increase or decrease over previous requirements. Include previous years' consumption reports.

1.1.4. States when munitions are required.

1.1.5. Is reviewed and validated by MAJCOM functional manager. The request is then provided to the MAJCOM AFCAT 21-209 manager who forwards the request to HQ AFSFC/SFOR, 1631 Stewart St., Suite 101, Lackland AFB TX 78236-5000, for Air Staff coordination and inclusion in AFCAT 21-209.

1.2. Changing Authorizations. Send requests for change first to the MAJCOM functional manager for review and validation, then to the command AFCAT 21-209 manager who forwards the request with supporting documents to HQ AFSFC/SFOR.

1.2.1. Units may request one-time authorizations for items needed for special projects, missions, or training not covered by this publication.

1.2.2. Units may request interim changes to a munitions authorization.

1.2.3. Each request includes computation methodology on how the new requirement was determined.

1.3. Developing Requirements Forecasts. Use the authorizations in this catalog to develop annual munitions forecasts. Each activity responsible for an operational mission or for providing training with munitions:

1.3.1. Determines type and quantity of munitions needed to support peacetime and contingency needs.

1.3.2. Determines number of participants or classes requiring training during the forecast period and computes required munitions quantities.

1.3.3. Compares required munitions quantities to previous years' expenditures. Adjusts forecasts to the lower of computed required quantities or previous year's expenditures plus 10 percent. Command functional managers may approve exceptions based on adequate justification such as mission changes, new training requirements, etc.

1.3.4. Provides total munitions requirement to Munitions Operations for forecasting in the RCS: MTC-XR (A) 9452, Air Munitions Forecast (Peacetime Conventional Ammunition Requirements).

Munitions Operations personnel will coordinate the forecast with the affected unit commander to assure the requested items and quantities are necessary to meet operational and training needs.

1.4. Records and Reports. Records and reports of munitions expended are used to establish, validate, and fund forecast submissions. MAJCOM functional managers maintain a record of expenditures for the past 2 years. Use these records and reports of past munitions expenditures to establish realistic forecasts in support of future operational and training requirements. Functional managers should keep a copy of their RCS: MTC-XR (A) 8503 forecast.

1.5. Training Requirements Validation. Command functional managers review their ground munitions forecast and ensure Category D (training) requirements are consistent with historical expenditure data. They also justify any requirement exceeding the previous year's expenditure by more than 10 percent.

1.6. Special Instructions. The following special instructions apply.

1.6.1. Functional areas must coordinate munition local purchase items with command munition managers. Local purchase of munitions items (USAF Stock List, FSC 13XX) usually occurs at base level.

1.6.2. If training conditions do not permit use of an identified munition, MAJCOMs authorize units to forecast for substitute items. Example: Approved units may forecast for and use 7.62mm, ball in lieu of 7.62mm 4 ball/1 tracer due to fire hazards on their training ranges.

1.6.3. Commanders will forecast Category B (Non-NCAA WRM) requirements to Munitions Operations personnel for reporting to the parent MAJCOM.

1.7. Lead Time for Delivery of Munitions. New or increased munitions requirements can take 2 or more years after forecast before items are available. Programming, approval, funding, and procurement actions make up this lead time. The Air Force's ability to support operational and training requirements is directly dependent upon the timeliness and accuracy of forecasts. Munitions users should order only what they can use and use what they order. By following this simple methodology, end of year munitions excesses will be minimal.

GENERAL INFORMATION

Section 2A—Headquarters US Air Force Directed Training, Exercise, Competition, and Weapons Maintenance Authorizations

2.1. General Information.

2.2. Establishes Munitions Authorizations for Training, Exercises, Evaluations, and Competitions.

Establishes munitions authorizations for training, exercises, evaluations, and competitions. Foreign government students or personnel from any branch, department, or activity of the US Government attached to the Air Force as students for training receive the same authorizations as Air Force personnel.

2.2.1. For Training and Qualifying Air Force Personnel With Firearms as Directed By AFMAN 36-2227. These are per person authorizations and in addition to authorizations in succeeding sections. (See notes 1, 2 and 3). (OPR: HQ AFSFC/SFX)

NOTES:

1. Combat arms is authorized to forecast for cal 5.56mm (A071) or cal 5.56mm NATO (A059), or a combination of both, but not authorized more than 500 rounds total authorization.
2. Combat arms is authorized to forecast for cal 5.56mm 4/1 or cal 5.56mm linked, or a combination of both, but not authorized more than 1,000 rounds total authorization.
3. Per base for range testing.
4. Combat arms is authorized to forecast for cal 5.56mm, tracer (A068) or cal 5.56mm, tracer (NATO) (A063), or a combination of both, but not authorized more than 200 rounds total authorization.
5. An additional 1,000 rounds is authorized for combat arms personnel attending firearms training courses.

6. Combat arms is authorized to forecast for cal 7.62mm, ball (A164) or cal 7.62mm 4/1 (A165), or a combination of both, but not authorized more than 1,000 rounds total authorization.
7. An additional 500 is authorized for submachine gun.
8. For initial training only.
9. For M14, rifle standoff munition disrupter (SMUD) proficiency.
10. Combat arms personnel will forecast based on historical data, plus any future anticipated modifications to weapons. Authorizations will not exceed quantities listed in applicable TOs per weapon.

2.2.4. For Conducting Elementary Level Excellence-in-Competition and Pistol Matches IAW AFI 34-227 (OPR: HQ AFSVA/SVPAF).

	Per Competitor
Cartridge, cal 5.56mm, ball, FSC 1305 A071	60

Chapter 3

OPERATIONAL MUNITIONS AUTHORIZATIONS

Section 3A—Security Forces and USAF Special Investigations Academy (USAFSIA) Munitions Authorizations

3.1. General Information. Munitions authorized in Part Three are for operational peacetime, wartime, and contingency missions. They are maximum authorizations and functional managers should consider factors such as storage requirements when preparing munitions forecasts.

3.2. Definitions:

- 3.2.1. Fighting Load (FL): The munitions quantity supervisors decide to issue to individuals or gun crews for armed duty. This is normally the munitions quantity individuals carry on their persons or gun crews have immediately available. Functional managers, commands, and supervisors determine fighting load quantities. FL is normally supported from basic quantity stocks during the first few days of an operation. Sustaining quantity is used if necessary for subsequent support.
- 3.2.2. Basic Quantity (BQ): The munitions quantity authorized to establish a stockpile from which to issue FLs to persons and gun crews performing armed duty. BQ normally accompanies deploying forces; therefore, supporting commands forecast and provide basic quantities of ammunition.
- 3.2.3. Sustaining Quantity (SQ): The prepositioned quantity of a specific munition authorized to establish a resupply stockpile. Supported commands forecast for and preposition munition sustaining quantities based on threat analysis or possible resupply difficulties.

3.3. Security Forces and USAF Special Investigations Academy (USAFSIA) Munitions Authorizations.

3.3.1. For Protection of Air Force Installations, Equipment, and Personnel (OPR: HQ AFSFC/SFO and USAFSIA/BCW). These munitions are separate and in addition to air base defense authorizations. They are to establish operating levels for security forces and Air Force Office of Special Investigations functions.

NOTES:

1. Tracer ammunition is optional for CONUS commands. However, CONUS units with an overseas deployment mission must maintain the required amount of tracer ammunition.
2. Functional managers and MAJCOM or theater commanders establish FL ball to tracer ratios for 5.56mm ammunition based upon a particular operational mission situation.
3. Use of item is at MAJCOM option.
4. This is a "per installation" authorization.
5. This is "per nuclear weapons storage area/alert aircraft parking area" authorization.
- | 6. Deleted.
7. This is a "per off-base nuclear convoy" authorization.

8. This is a "per nuclear response force fire team" authorization.

9. Authorized for use by Air Force personnel engaged in law enforcement activities; protecting classified information, systems, or equipment; protecting the President of the United States, high ranking government officials, DoD personnel, or foreign dignitaries; protecting DoD assets and personnel; and guarding prisoners.
